Choose one global driver and one local driver from the list to create two axes that will drive your scenarios.

Example

Some local drivers (X AXIS)

– influencer/change agents/communities
– local governance and policy
– local mobility and transport
– advocacy (re: legislative policy)
– tech access (including affordability)
– housing access
– carbon credits/tax (or similar)
– racism, sexism, ableism, ageism
– population density
– demographics
– alternate currencies
– ethics of production
– ethics of consumption
– cultures of repair
– resource contamination
– waste and sanitation
– health challenges and services
– crime (violent/non-violent, penalties)
– local biodiversity
– communication and languages
– local knowledge systems
– media control/access
– education (drivers)

+ Add four more of your own

– _____
– _____
– _____
– _____

Some global drivers (Y AXIS)

– state of global climate crisis
– global biodiversity
– displaced populations
– virus and epidemic controls
– influence of intergovernmental bodies, agencies and panels (e.g. UN, IPCC, World Bank)
– extremism
– currencies, trade and investment
– economic sanctions
– international accords
– cyber security
– borders/international mobility (cost/access)
– economic sanctions
– resource wars
– civil uprisings

+ Add four more of your own

– _____
– _____
– _____
– _____

After setting up your two axes, formulate a driving question relating to your chosen themes that could apply to any one of the 4 scenarios. *e.g. How might we connect with others in the future?*
