

Chosen material: ● Bacterial cellulose (SCOBY)

Similar/Alternative Materials: ▲ leather

■ cotton

+ \_\_\_\_\_

### Description

A very thin material that feels like leather but is less flexible and has a tough surface. Colour is brown and translucent. Can be woven if cut into thin strips and is compostable.

#### Examples of applications:

### Images of Material

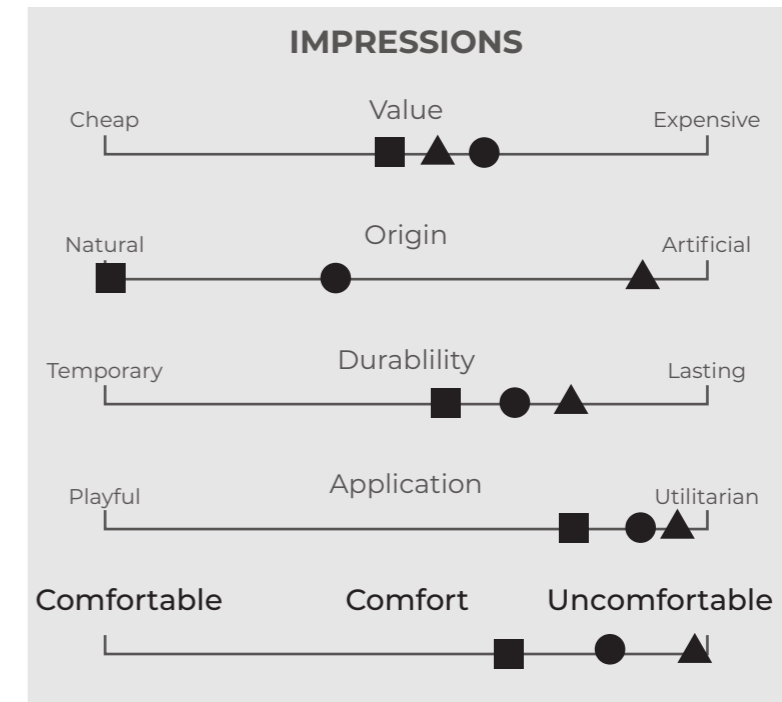

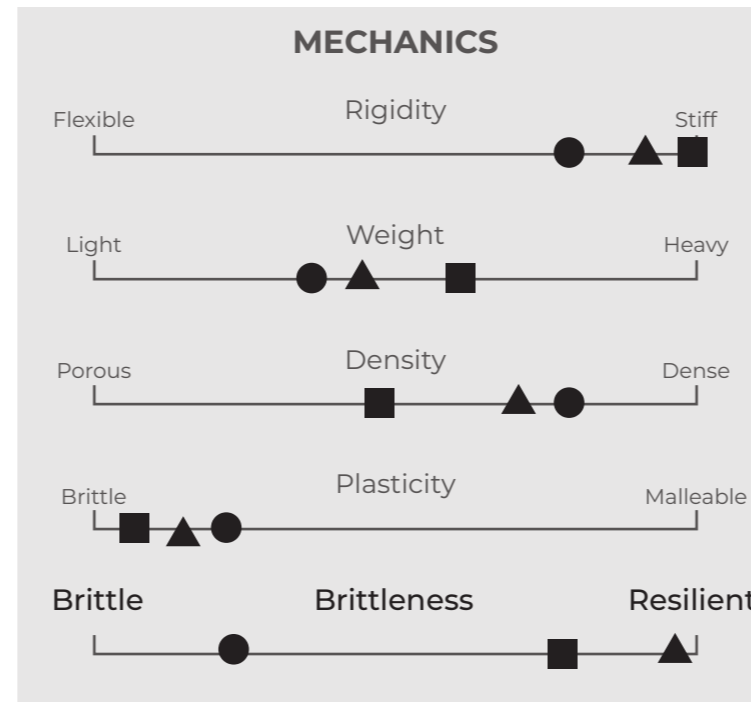

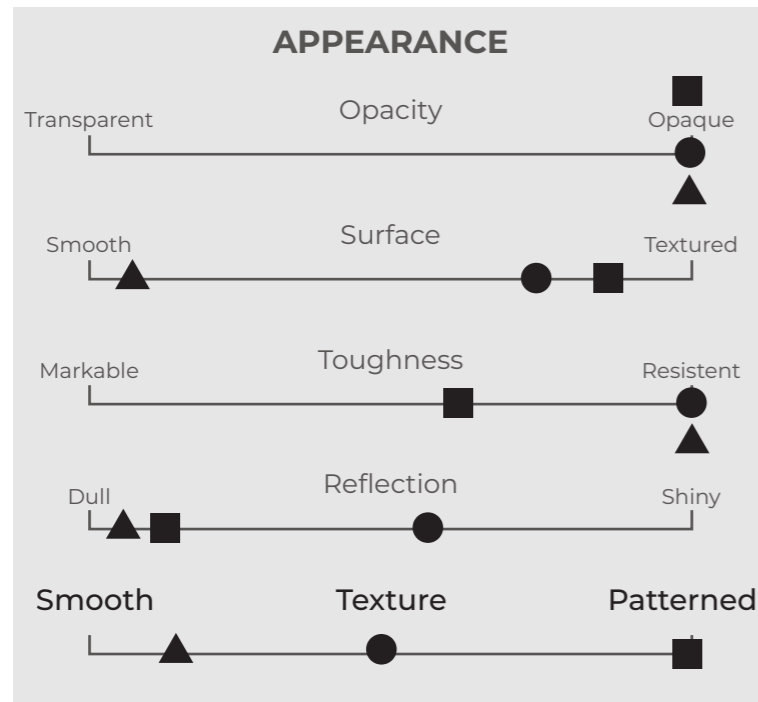

Chosen material: ● Coffee ground composite

Similar/Alternative Materials: ▲ fibreglass

■ wood

+ \_\_\_\_\_

#### Description

Coffee grounds bound by resin from natural or synthetic origin. A rigid, hard and opaque material. Feels lighter than expected for a resin-based material
